Closed Sept. 8-Oct. 20

Riverside Drive to Close between Riviera and Cheatham

The City of San Marcos will close Riverside Drive between Riviera Street and Cheatham Street beginning Wednesday, September 8, 2010, at 7 a.m. to begin utility work and a water line bore under the railroad tracks. The street is scheduled to remain closed to through traffic until October 20, 2010.

Residents and businesses located in the construction zone will have access to their property and mailboxes during construction. All other through traffic will be detoured to Cheatham Street and Hopkins Street to avoid the area.

During the scheduled closure, Haynes Street may be accessible periodically from Riverside. The Hopkins Street water line bore scheduled to begin August 30 has been postponed until after the work on Riverside is complete.

The construction is part of the \$8.5 million Rio Vista Terrace Neighborhood infrastructure project currently underway.

Texas Sterling Construction Company of Austin began work in March on the construction project that will alleviate drainage issues and provide new streets, curbs, sidewalks, water service and wastewater service to more than 300 families and 25 businesses.

Project management is provided by Bain Medina Bain of San Antonio with Byrn & Associates of San Marcos as project engineer. The Rio Vista Terrace construction is scheduled for completion in spring 2012.

For more information on this project, call the City of San Marcos Capital Improvements Department at 512.393.8130 or email cip@sanmarcostx.gov.
